Shark Matching

Great White Shark

- Largest Reported:** "Deep Blue" was recorded to be an estimated 20 feet long and weighing around 2.5 tons.
- Average Size:** Great Whites range from 11 to 16 feet and can weigh from 1,151 to 2,450 pounds.
- Locations Found:** They live in coastal and offshore waters and like temperatures to be around 55 to 75°F.
- Characteristics:** The great white shark is the largest predatory fish that feeds on many large mammals and can swim up to 35 mph!

Hammerhead Shark

- Largest Reported:** The longest recorded hammerhead was 20 feet long and the heaviest recorded hammerhead weighed 991 pounds.
- Average Size:** Hammerheads average length are around 13.1 feet and can weigh 500 pounds.
- Locations Found:** Hammerheads like to stay in deeper waters along the coast.
- Characteristics:** They love eating crustaceans, bone fish and even their own.

Tiger Shark

- Largest Reported:** The longest tiger shark was to be around 18 feet long.
- Average Size:** Tiger sharks range from 10 to 14 feet and can weigh from 850 to 1,400 pounds.
- Locations Found:** They like to stay in more shallow waters in tropical areas.
- Characteristics:** Tiger sharks are very aggressive and will eat anything they see including garbage.

Shark Matching

Blue Shark

- Largest Reported:** A 20 foot blue shark was once reported but never recorded by scientists and the heaviest recorded blue shark weighed 861 pounds.
- Average Size:** Blue sharks range from 6.5 to 10 feet and can weigh from 60 to 400 pounds.
- Locations Found:** Blue sharks like to live in cooler waters and as far North as Norway and they like to swim close to the surface of the water.
- Characteristics:** They give birth to live young and its main diet is based on squid and fish.

Whale Shark

- Largest Reported:** The largest whale shark was recorded to be an estimated 41.5 feet long and weighing around 2.6 tons.
- Average Size:** Whale sharks average length is 32 feet and can weigh 20,000 pounds.
- Locations Found:** They like to stay in tropical areas swimming on the surface and diving as low as 5,900 feet deep.
- Characteristics:** Whale sharks are not aggressive as they eat small fish and plankton and also live up to 70 years.

Bull Shark

- Largest Reported:** The largest bull shark reported was around 771 pounds.
- Average Size:** Bull sharks range from 7 to 11 feet and can weigh 200 to 500 pounds.
- Locations Found:** They like to stay in tropical areas swimming the shorelines in salt and fresh water.
- Characteristics:** Bull sharks are very aggressive and are one the most dangerous towards humans.

Shark Matching

Basking Shark

- Largest Reported:** The largest basking shark reported was 40.3 feet.
- Average Size:** Basking sharks are normally around 26 feet and can weigh more than 9,000 pounds.
- Locations Found:** It swims on the surface and down to depths of 3,000 feet.
- Characteristics:** They are very large but are not aggressive and eat plankton mostly.

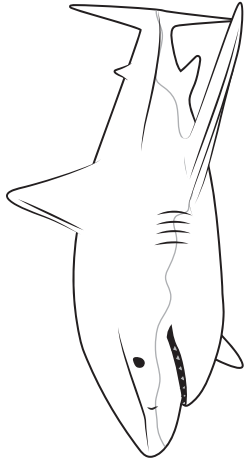

Leopard Shark

- Largest Reported:** The largest leopard shark recorded was 6.9 feet and 41 pounds.
- Average Size:** Leopard sharks range from 5 to 7 feet.
- Locations Found:** They like shallow waters with muddy bottoms to hide them.
- Characteristics:** These sharks are not aggressive towards humans and are quick to run away.

Mako Shark

- Largest Reported:** The largest leopard shark recorded was 12.2 feet and 1,323 pounds.
- Average Size:** Mako sharks average size is around 14.8 feet and 1,100 pounds.
- Locations Found:** They live in warm waters along the equator.
- Characteristics:** Makos are smart hunters that eat just about anything. They also love to jump out of the water!
